

Hoot Wiseman Bio:

My name is Hoot (Alan) Wiseman and I have been a resident of Suntree since December 1998. I am seeking another term on the Board of Directors.

I am currently serving on the Board of Directors of Suntree Masters 'as Vice President and serve as Chairman of the Architectural Review Committee and the Insurance Committee.

My wife, Monica, and I moved to Suntree from the Washington, DC area for my last assignment with the Navy. We built a home in the Sabal Palm Estates subdivision and settled in as permanent Florida residents.

I spent my Navy career in Submarines, first in Nuclear Power (Engineering), then in Nuclear Weapons. I also served in Strategic Systems Programs in DC, training and certifying ballistic missile submarine crews to carry and deploy nuclear weapons. I retired from the Navy in 1999 as a Lieutenant Commander qualified in Submarines. Shortly after that I joined Bellsouth (now AT&T) as a Manager in Engineering, was promoted to Project Manager and then to Senior Planning Engineer for Brevard County. I am now retired from AT&T. I have extensive experience in large project management, on-time product delivery, and leading/directing large groups of diverse personnel.

I also serve on the Board of the Sabal Palm Estates Homeowners Association. Currently serving as the Treasurer, I have been active on the sub-association board since 1999 and have held all the Officer positions (President, Vice President, Secretary, and Treasurer) for several years each. So, I am familiar in Suntree operations and procedures, and customer relations.

I also enjoy programming and running the music for various local Country Social dance and Line dance groups, though the pandemic has put most of those venues on hold for the time being. Monica and I are active in the Line dance community in Brevard County and look forward to returning to those activities once the pandemic is under control.

If selected, I feel my primary duty is to maintain the high level of services that Suntree provides to its residents, while ensuring transparency of BOD operations and fiscal responsibility.
